Chandra Asri Group Undergoes Scheduled Maintenance to Ensure Petrochemical Plant Reliability

Jakarta, January 12, 2026 – PT Chandra Asri Pacific Tbk (Chandra Asri Group), a leading provider of energy, chemical, and infrastructure solutions in Southeast Asia, is undergoing scheduled Turnaround Maintenance (TAM) at its petrochemical facilities in Cilegon, Banten, in line with standard global petrochemical industry practices. This activity is part of global petrochemical industry standards and is conducted periodically and in a planned manner to ensure the reliability, safety, and integrity of production facilities.

Turnaround Maintenance is carried out periodically and in a planned manner to ensure the continued reliability, safety, and operational integrity of the Company's production facilities. The activities are being implemented under Chandra Asri Group's operational governance framework and include the optimization of supporting facilities and upgrades to certain units to strengthen long-term operational readiness.

In line with Chandra Asri Group's commitment to responsibly managing petrochemical facilities that have been in operation for more than 33 years, the maintenance is being executed in an integrated and measured, without any permanent change to the plant's operational status. This initiative aims to ensure that the facilities continue to operate in accordance with established safety and performance standards, while supporting the Company long-term operational sustainability.

The maintenance will commence in January 2026, covering the Naphtha Cracker facility as well as the Polymer Plants (Polyethylene & Polypropylene), and is expected to last approximately 26 days. Meanwhile, maintenance activities at the Butadiene and MTBE & Butene-1 Plants are estimated to take around 41 days. During these periods, the Company is coordinating operations to minimize any potential impact on customers and the supply chain.

Suryandi, Director of Human Resources & Corporate Affairs of Chandra Asri Group, stated, "Turnaround maintenance is an essential part of good operational governance in the petrochemical industry. Through this scheduled maintenance program, we ensure that Chandra Asri Group's production facilities remain reliable, safe, and well-prepared to support Indonesia's industrial needs. The implementation of this TAM ensures that our petrochemical plants remain in optimal condition, thereby supporting the Company operational continuity and supply stability for our customers," Suryandi said.

All maintenance activities are conducted with established procedures and operational standards, with a focus on occupational health and safety and regulatory compliance.

As a Growth Partner (#YourGrowthPartner), Chandra Asri Group committed to ensuring the continuity of product supply to its customers while consistently supporting the sustainable fulfillment of national petrochemical industry needs.

About Chandra Asri Group

Chandra Asri Group is a leading provider of energy, chemical, and infrastructure solutions in Southeast Asia, supplying products and services to various manufacturing industries in both domestic and international markets. Since the Group's establishment in 1992, Chandra Asri has grown from strength to build our reputation as a reliable growth partner, with strategically well positioned assets in Indonesia and Singapore. The Group's asset base includes a refinery with a capacity of 237,000 barrels per day alongside a 1.1 million metric ton per annum ethylene cracker on Bukom Island, 2.5 million metric ton per annum downstream chemicals on Jurong Island and Indonesia's first naphtha cracker located in Cilegon with a capacity of 0.9 million metric ton per annum. The Company's business is supported by core infrastructure assets, including energy, water, ports & storage, and logistics. For more information, visit www.chandra-asri.com.
